

NYX

Sponsorship Packet

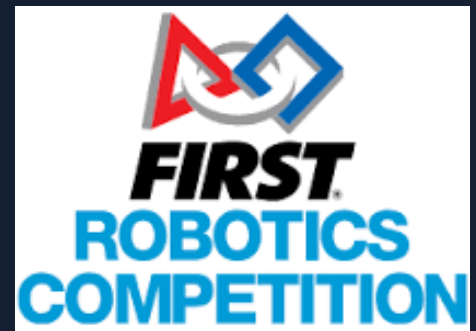

ABOUT TEAM NYX

Team Nyx (Team 11744) is a dedicated, nonprofit group of 50+ students who share a strong passion for robotics and engineering.

We compete in the FIRST Robotics Challenge where we build a fully functional robot to complete various tasks while also providing and participating in hands-on STEM education around the San Diego area.

Through the FIRST Robotics challenge program, we are able to compete in regional and international competitions, representing all of our peers, mentors, and supporters!

Your generous support will open up a gateway of possibilities for, not just our students, but many connected youth to unearth their potential, develop interests for STEM, and achieve goals and passions

What is FRC?

FRC

The FIRST Robotics Challenge (FRC) is a **global robotics competition** where teams design, build, and program robots to compete in head-to-head matches. The competition fosters and promotes **teamwork, cooperation, and exhibitions of skill** among teams, as well as places importance on a team's **community outreach efforts**.

Teams are challenged to design, build, program, and operate robots, **raise funds**, design and market their team brand, and engage in community outreach to earn specific awards **recognized at an international level**.

Because of FRC, our team can:

- ◆ *Use and apply core STEM principles to create a fully functional robot*
- ◆ *Outreach and connect with our community to spread awareness*
- ◆ *Collaborate with other teams, peers, and mentors*
- ◆ *Reach out to STEM mentors and gather and manage funds from companies*

Why Sponsor Us?

Team Nyx is a strong and dedicated team aiming to teach next-generation engineering skills.

Here's what **you** get when **you** support our mission:

1. Market Your Brand

*Your company or foundation can be featured on our **social media**, shoutouts, our uniforms, our website, and more based on your sponsorship package tier. You can increase **visibility and connection** with **tens of thousands of viewers**, especially at massive regional events*

2. Empower the Future

*Donating to our team allows us to host events, **register for competitions**, get better mentors, and is a pivotal role in **sending students to international-level competitions**. You will play an active part in the growth of hundreds of promising **future STEM professionals**.*

3. Tax Deduction

*All donations to Team Nyx are **entirely tax-deductible**, as we are fiscally sponsored by the **nonprofit Amazing Grace Institute** in San Diego. A simple and helpful act from you would set us up for **further success** in competition and allow you to **deduct money** from your taxes.*

Sponsorship Tiers

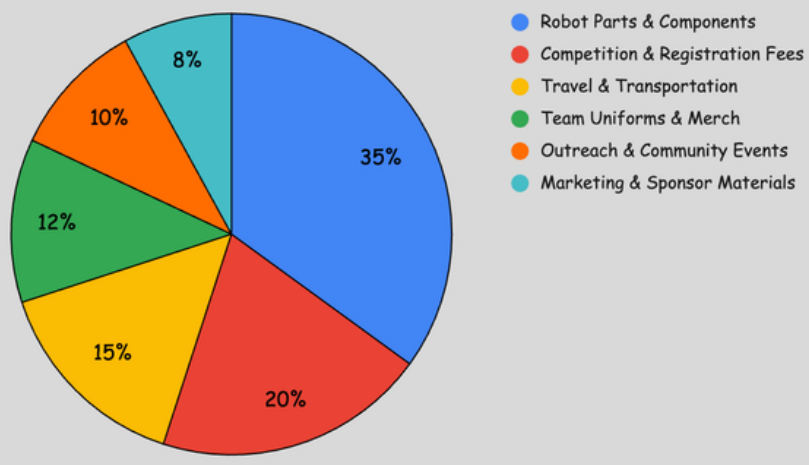

Perks	Bronze Tier \$100+	Silver Tier \$500+	Gold Tier \$1000+	Platinum Tier \$2000+
Company Name and Logo on Team Website*	✓	✓	✓	✓
Dedicated Social Media Shoutout	✓	✓	✓	✓
Company Logo on Team Shirt*		✓	✓	✓
Thank You Video from the Team		✓	✓	✓
Company Logo on the Robot*			✓	✓
Company Logo on Team/Pit Banner at Competitions*			✓	✓
Media Shoutout during Outreach/Local Events				✓
Invited to competitions as VIP guest (pit tours, meeting the judge, competition overview)				✓

*Please email frcnyx@gmail.com with an official, high-resolution PNG image of your company/brand's logo

WHERE WILL IT GO?

Team Nyx's Funding Allocation for the 26-27 Season

Team Nyx is a passionate, student-led robotics team that is committed to innovation, engineering, and community impact, but none of that is possible without the resources to back it up. Your sponsorship goes directly towards specially-designed robot parts and compenents, competition registration and travel fees, professional uniforms, outreach events, and more where we inspire the next generation of STEM leaders. Every dollar donated is a dollar invested in students who are not just building a robot, but who are developing the skills, impact, and experience to change the world.

Category	Estimated Cost
Robot Parts & Components + Building Tools and Equipment	~\$15k
Competition & Registration Fees	~\$15k
Travel & Transportation	~\$3k
Team Uniforms	~\$1k
Outreach & Community Events	~\$5k
Marketing/Outreach/Sponsor Materials	~\$1k
Total Estimated Cost for Season	~\$40k

HOW YOU CAN SUPPORT US

Tools & Equipment:

We would appreciate if your company would consider donating or loaning tools and equipment to Team Nyx. Power tools like drills and grinders, hand tools like calipers and wrenches, a 3D printer for rapid prototyping, or even time on a CNC machine or laser cutter, would be massively appreciated.

Mentorship & Expertise:

We believe that the most powerful thing an experienced professional can give a student is their time, and we are actively seeking mentors from local companies who are willing to share their knowledge with our team, and your expertise would be invaluable to us during our upcoming season.

Media & Marketing:

We are working hard to tell our story and grow our presence in the San Diego community, and we would love the support of a creative or marketing partner to help us do it. If your company offers photography, videography, graphic design, printing, or web services, a donation of those skills would go a long way.

ADDITIONAL MATERIALS

Materials & Supplies:

Building a competitive FRC robot requires a significant amount of raw materials and consumables, and we are reaching out to local suppliers and manufacturers to ask for donations of materials that would directly go into our robot and team operations. We are looking for items like aluminum extrusion, steel tubing, fasteners, electronics components, wiring, and connectors catering, as well as anything else your company may be able to contribute.

Travel & Logistics:

Competing at regional and championship events means getting 50+ students, a full robot, and all of our equipment across the city or even across the country, and travel costs are one of the most significant expenses any FRC team faces. We are reaching out to ask if your company would be willing to support us through transportation, lodging, or freight shipping. Whether that means providing a van or truck to move our robot, covering hotel rooms for competition weekends, or sponsoring the cost of shipping our robot to a championship event, any travel support will be greatly appreciated.
